MOUAWAD CONSULTING ACCELERATES GROWTH WITH OPENING OF NEW OFFICE IN BUSAN, KOREA AND PARTNERSHIP IN PANAMA

New office expansion enables Mouawad Consulting to accelerate growth in retrofit and commissioning of BWMS in the Asian Market as well as turnkey retrofits in the Americas

Hamar, Norway, April 3, 2018– Mouawad Consulting, the leading provider of consultancy and engineering services related to Ballast Water Management onboard ships, recently opened a new office in the city of Busan, Korea, to accommodate rapid growth and leverage the area’s diverse needs for retrofit and commissioning services for BWMS. In addition to the headquarters in Hamar, Norway, and our branch offices in Shanghai, China and Beirut, Lebanon, the new office doubles our footprint and supports the company’s growth strategy. Mouawad Consulting’s strategic agreements with some of the largest ship owners as well as the excellent relationship with the Korean BWM industry, has accelerated the company’s growth and resource requirements. Our partnership in Panama with a leading supplier of manpower and material, further strengthens our turnkey capability when retrofitting BWMS as well as consultancy in the area.

“The decision to expand our presence into Korea was a logical step in our business growth strategy,” said Jad Mouawad, CEO. “The area is the central hub for makers of BWMS, with whom we have excellent relationships over many years. We have also expanded our presence and installation capability by entering into strategic agreement with a major player in Panama, covering the Central American market.”

The company’s offices will be on 292-12, *Shinho-dong, Gangseo-Gu, Busan, Korea* and can be contacted at info@bwm.no and +82 10-7410-1101.
